

MSE Achieves Final Certification For ISO 14001

VAN NUYS, CA – Micro Solutions Enterprises achieves final certification for ISO 14001 compliance.

“For 15 years, MSE has been an environmentally conscious company,” said Craig Faczan, Marketing Manager. “Because we are a remanufacturing company, we are a large-scale recycler as well. Not only do we prevent millions of spent toner and inkjet cartridges from potentially entering our landfills every year, MSE also recycles more than 1.7 million pounds of manufacturing scrap annually. Our ISO 14001 accreditation exemplifies our commitment to the environment and we are proud to offer an environmentally conscious product line that also has the quality that our dealers and ultimately their consumers demand.”

MSE has achieved the ISO 14001 accreditation, exemplifying their current and future commitment to the environment. The ISO 14000 environmental management standards exist to help organizations systematically reduce the impact of the environmental aspects which an organization can control. ISO 14001 is the international specification for an environmental management system (EMS). It specifies requirements for establishing an environmental policy, determining environmental aspects and impacts of products/activities/services, planning environmental objectives and measurable targets, implementation and operation of programs to meet objectives and targets, checking and corrective action, and management review.

The ISO 14001 Environmental Management System is an internationally accepted specification for environmental management systems created by the International Organization for Standardization to help organizations minimize how their operations affect the environment and comply with related laws, regulations and requirements.
