Benefits & Features

- The HP® CP6015 printer is ideal for any high-volume print jobs and in-house marketing needs. Has the capability to print color documents from letter size up to 12.6" x 36" banners.
- HP® added the CP6015 family of printers to its "Light Production" (A3) market released in 2008. It replaced the HP® Color LaserJet 9500 first released in 2003.
- Great dealer margins available to OEM customers seeking true alternatives to the very costly OEM cartridges.
- The CP6015 and CM6030/CM6040 consumables are practically 100% OEM share today. This opens up opportunities to capture share in transactional sales as well as CPP/MPS sales of these profitable cartridges.

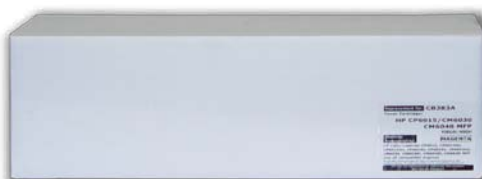

Absolute Color Technologies (ACT) is the culmination of years of research, development, and deployed resources with the goal of providing the industry's first and only OEM alternative color toner cartridges.

At MSE, every aspect of our products from quality and reliability to aesthetics and environmental impact is thoroughly analyzed on an ongoing basis. We look for areas of continuous improvement and create ground-breaking patented technologies to keep pace with OEM design. The result is a better built, higher quality, more consistent product.

Packaging option: Generic white box.*

Generic Brand

*Due to non-standard size of the cartridge, MSE opted to use generic white packaging until volume dictates the need for an MSE and Generic Brand packaging option.

- HP® decided to use a different black cartridge for the HP® CM6030 and CM6040 MFP printers to offer a low black Cost Per Page (CPP) for their segment 5 (A3) digital printer/copiers.
- At this time MSE does not offer a 19,500 page black toner cartridge (CB390A) for the HP® CM6030 and CM6040 MFP printers because of the very low OEM street price for this model.
