## MSE Brand Benefits & Features

- MSE jumbo cartridges offers up to 50% yield increase when compared to the OEM.
- Engineered for optimal yield for MPS and cost per page sales models.
- First released November 2008, the P2055 printer series replaces the P2015 series released in January 2007.
- The P2055 series is HP's segment 2 offering. The P2055 is ideal for small and medium sized workgroup environments.
- MSE as always approved this product using the markets most exhaustive testing protocols including; environmental stress testing, accelerated aging testing, shipping simulation, and ISO 19752 testing.

## INTELLIGENT RE-ENGINEERING™

At MSE, every aspect of our products from quality and reliability to aesthetics and environmental impact is thoroughly analyzed on an ongoing basis. We look for areas of continuous improvement and create ground-breaking patented technologies to keep pace with OEM design. The result is a better built, higher quality, more consistent product.

The ISO 19752 standard is a standardized page yield test for monochrome (b/w) laser printer cartridges. The test is done with a minimum of nine cartridges tested on three separate printers with a standard print/test page under specific environmental conditions and printer settings. MSE monochrome cartridges meet/exceed OEM yield based on ISO 19752 test methodologies.
